

CONTROL PANEL SHOP

Small Team. Big Results.

1622 Southpark Ct, Suite D
Columbus, Indiana

At Blentech, our UL 508A–certified control panel shop delivers custom-built panels with precision, speed, and direct access to a dedicated engineering team. We may be a small shop, but that means no layers, no delays, just skilled people focused on your project.

DIRECT ACCESS. REAL SUPPORT

When you work with us, you get:

- A dedicated **project manager who answers the phone**, tracks every detail, and sources components from multiple suppliers to keep your build on schedule.
- **Two in-house controls engineers** are available for technical clarification and design validation.
- **Three experienced panel builders** who take pride in clean layouts, precise wiring, and production-ready workmanship.

SMART SOURCING = BETTER PRICING

Our strong supplier relationships translate into a cost advantage for you:

- Excellent pricing and availability on Allen-Bradley / Rockwell Automation components
- Competitive sourcing on Phoenix Contact and a broad range of panel hardware brands
- We leverage our buying power so you don't overpay for automation components.

BUILT FOR INDUSTRY

We build panels for demanding environments:

- Food & Beverage
- Oil & Gas
- Process Systems
- Explosion-Proof & Hazardous Location Applications

Whether you bring us a completed design or a conceptual idea, we bring it to life.

CERTIFIED & LOCAL

Built to Code. Delivered Close to Home.

- UL 508A & CE Certified Panel Shop
- Local delivery from our Midwest facility, international shipping available
- Fast turnaround, clean documentation, and panels built exactly to spec
